

UNIVERSITY OF NORTH★TEXAS™

Department of Philosophy and Religion Studies

presents

A Lecture By

Dr. Bill Forbes Environmental Philosophy: Some Past and Future Applications

Environmental philosophy is criticized by mainstream philosophers as being too applied, and by environmental managers as being too theoretical. This talk will highlight a few past personal and professional uses of environmental philosophy in forestry, including implementation of Leopold's land ethic and development of the Society of American Foresters Code of Ethics. It will also open for discussion ideas on possible future applications of environmental philosophy.

Please join us for this informative talk from our honored alumnus!

Bill Forbes is Visiting Assistant Geography Professor at Stephen F. Austin State University. He has an MA in philosophy, an MA in Geography, and a PhD in Environmental Science from UNT.

Friday, April 21 at 3:00 in EESAT 225A

This lecture is free and open to the public.
